Eventual notes
The facility manager declares that the other rooms adapted for people with disabilities have similar characteristics to the one visited, including the toilet, since they are located on the same column and have the same square footage. The manager also reported that some standard rooms, located in columns 22, 25 and 26, can be reached via a flat path and have large interior spaces and a shower of adequate size. However, access to the shower has the classic step of standard shower trays. It was not possible to directly verify these characteristics by inspection, since at the time of the visit the rooms were occupied. The information reported is therefore based exclusively on the declaration of the person in charge of the structure
